PUBLIC HEALTH STAFF.

Medical Officer of Health:

W.R.NASH, M.R.C.S., L.R.C.P., D.P.H.,

Deputy Medical Officer: (part time)

J.S.BRIGGS, M.B.,

Consultant Medical Staff for Maternity and Child
Welfare:

Obstetrics - Professor GILBERT D. STRACHAN.

Paediatrics - A.G. WATKINS, M.D., M.R.C.P.,

Orthopaedic - A.O. PARKER, M.D., C.M.,

Medical Officer to Gynaecological Clinic:

SYBIL MORGAN, B.Sc., M.R.C.S., L.R.C.P.,

Sanitary Inspectors:

A.B. W. LLOYD JONES

A.B. W. R. LIDDINGTON

Inspector of Petroleum and Explosives:

A.B. W. LLOYD JONES

Health Visitors:

C.E. E. DIXON.

A.C.E.F. C. THOMAS.

C.E. E. JAMES.

Matron, (Isolation Hospital):

C.D.E. K. OWENS.

Clerk: R. JAMES.

- A. Sanitary Inspector's Certificate.
- B. Meat and Food Inspector's Certificate.
- C. State Registered Nurse.
- D. State Registered Fever Nurse.
- E. Certificate of Central Midwives' Board.
- F. Health Visitor's Certificate.

CAERPHILLY URBAN DISTRICT COUNCIL.

ANNUAL REPORT OF MEDICAL OFFICER OF HEALTH.

Public Health Department,
Council Offices,
Caerphilly.

To the Chairman and Members of the
Caerphilly Urban District Council.

Mrs.Harris and Gentlemen,

In accordance with the instructions of the
Ministry of Health, I herewith beg to submit an
abbreviated Annual Report for the year 1939.

My instructions are to preserve all statistics
and details of the health of your area until the war
is concluded, when a comprehensive report for the
whole period will be published.

I was called to military service on the 13th
September 1939, and from that day until the end of
the year, my duties were carried out by Dr.J.S.Briggs,
Deputy Medical Officer of Health.

I cannot allow this opportunity to pass without
expressing my thanks to Dr.Briggs, and my appreciation
of the loyal and tactful manner in which he carried on
during my absence.

My thanks are also due to every member of the
Health Staff for the loyal manner in which they have
worked, and for their cheerful co-operation in the
heavy additional duties which have been imposed upon
all as a result of the war.

I am,
Mrs.Harris and Gentlemen,
Your obedient Servant,

W.R.NASH,
Medical Officer of Health.

SUMMARY OF GENERAL AND VITAL STATISTICS.

Area (Land)	-	-	-	12,931 Acres.
Population (Census 1931)	-	-	-	35,760.
Population Estimated mid 1939	-	-	-	31,990.
Number of New Houses erected in 1939	-	-	-	Nil.
Total Number of Inhabitated Houses	-	-	-	7,565.
Estimated Number of Persons per occupied House	-	-	-	4.2
Rateable Value	-	-	-	£109,300.
Estimated product of ld. Rate	-	-	-	£390.
(Registered	-	-	-	639.
Live Births(Notified	-	-	-	604.
Birth Rate per 1,000	-	-	-	19.9
Deaths	-	-	-	417.
Death Rate per 1,000	-	-	-	13.
Excess of Births over Deaths	-	-	-	222.
Deaths under one year	-	-	-	42.
Rate per 1,000 Live Births	-	-	-	65.7
Deaths of Women in Child Birth:-				
	Number	Rate per 1,000 Live Births.	Rate per 1,000 Total Births.	
Puerperal causes-	5	7.8.	7.7	
Comparability Factor-	1- 21			

DEATHS FROM VARIOUS CAUSES.

	Males.	Females.	Total.
Cancer	19.	10.	29.
Tuberculosis Respiratory System	9.	14.	23.
Tuberculosis other causes...	4.	3.	7.
Cerebro-Spinal Fever	1.	2.	3.
Influenza...	5.	3.	8.
Diphtheria	2.	1.	3.

Scarlet Fever	0.	0.	0.
Measles	3.	2.	5.
Enceph. lethargica	2.	0.	2.
Diarrhoea 2 yrs & Over	1.	0.	1.
G. P. I. Tabes, &c	2.	0.	2.
	<u>253.</u>	<u>164.</u>	<u>417.</u>

GENERAL HEALTH SERVICES.(a) Laboratory facilities.

The County and City Public Health Laboratory at Cardiff continued to serve the area during the year. The examination of diphtheria swabs, virulifne tests, and examination of milk and water samples comprised most of the work submitted. The cost of this service was £72.

(b) Ambulance facilities.

The position remains substantially the same as in previous years. The Miners Federation provide an ambulance for the Workmen's Medical Scheme at Abertridwr, and have an arrangement with the Order of St. John at Llanbradach. Private ambulances are available for hire and this is the Council's procedure in the event of street accidents for all cases (excluding Infectious Disease), requiring removal to hospital. The County Council ambulances exclusively for Air Raid Precaution duties are under Council Control.

I consider the position still unsatisfactory, on grounds of the standard of hired vehicles and a question of general control, but it seems that the provision of a Council ambulance for general purposes, must be postponed until the War is over.

(c) Nursing in the Home.

This remains, as in previous years, i.e. Nursing Associates employing a nurse for their members, in return for small weekly contributions.

(d) Treatment Centres and Clinics.

These remained exactly the same as in previous years.

(e) Hospitals- Public and Voluntary.

The position is the same as in previous years. The proposed changes at the Caerphilly District Miners Hospital did not materialize. The establishment of a Fixed First Aid Post in the out-patient department of this Hospital has not been conducive to improving services.

The need for a Casualty Department in the area remains as grave as ever.

MATERNITY & CHILD WELFARE.(i) Maternity Services.

These remained as for the past two years, with the attendances at Ante-Natal Clinics still showing a slight increase.

COMPARATIVE TABLE FOR BIRTH RATE, INFANT
MORTALITY RATE, AND DEATH RATE FOR
THE PAST 14 YEARS.

	Birth Rate.	Infant Mortality.	Death Rate.
1926.	23.6	96.	10.1
1927.	20.7	120.7	11.3
1928.	21.24	98.4	10.7
1929.	17.87	72.5	10.4
1930.	17.1	73.9	10.004
1931.	21.8	84.5	12.2
1932.	17.3	90.4	12.04
1933.	19.45	85.16	13.40
1934.	20.5	61.79	12.5
1935.	19.5	77.7	12.6
1936.	17.3	76.0	11.5
1937.	19.04	69.0	13.7
1938.	17.3	66.0	13.0
1939.	19.9	65.7	13.0

The Maternal Mortality Rate during the past 10 years is as follows:-

<u>Year.</u>	<u>Maternal Death Rate per 1,000 Births.</u>
1930,	2.8
1931	2.6
1932	11.1
1933	10.3
1934	8.4
1935	8.9
1936	3.2
1937	1.6
1938	3.5
1939	7.7

This rate appears abnormally high, but as in those years, when the rate was extremely low, I must point out that the figures dealt with are too small to have any comparative value.

The following table shows the amount spent on additional nourishment for expectant and nursing mothers and children up to five years of age.

	<u>1934.</u>	<u>1935.</u>	<u>1936.</u>	<u>1937.</u>	<u>1938.</u>	<u>1939.</u>
Fresh Milks.	£720.	£696.	£893.	£546.	£854.	£997.
Dried Foods.	£687.	£725.	£702.	£874.	£889.	£542.
	<u>£1,407.</u>	<u>£1,421.</u>	<u>£1,595.</u>	<u>£1,420.</u>	<u>£1,743.</u>	<u>£1,539.</u>

It will be observed that the amount of fresh milk used again increased during the year which seems to indicate that the public are becoming increasingly aware of the great advantages of Tuberculin Tested Milk.

The cost of other services were as follows:-

Provision of Dentures-	£94.
Orthopaedic Hospital Treatment-	£125.
Maternity Hospital Treatment-	£370.
Ambulances for street accidents,	
Maternity cases etc-	£42.
Home Helps-	£30.
Medicines-	£20.

The detailed statistics of the Clinics in each Ward is as follows:-

ABERTRIDWR WARD.

Total attendance at Ante-Natal Clinics-	292.
Average " " " " "	26.5
Total attendances at Infant Welfare Clinics-	1,180.
Average " " " " "	59.

[Faint handwritten notes]

GENERAL SANITATION.

WATER SUPPLY.

Six samples were taken during the year, four from Swimming Pools, and two from the Hamlet of Groeswen. The pool samples were satisfactory, but the latter were of doubtful bacteriological purity.

The proposed water supply at Groeswen has not materialized from causes outside the control of this department.

DRAINAGE AND SEWERAGE.

The position is exactly the same as in previous years.

RIVERS AND STREAMS.

Position as in previous years.

CESSPITS AND CLOSET ACCOMMODATION.

During the year 16 cesspits were cleaned at a cost of £16.12.6.

There has been no conversion from conservancy into water carriage system.

PUBLIC CLEANSING.

The position is still unchanged with need of a low loading type of vehicle as great as ever.

SANITARY INSPECTION OF THE AREA.

Inspections made under the Public Health Act-	2156.
Investigations & Visits in cases of Infectious	
Disease-	208.
Revisits to unobated Nuisances-	1732.
Remises Disinfected-	247.

The following visits and inspections were made in connection with the following:-

Water Supply-	1005.
Drainage-	731.
Stables & Piggeries-	88.
Offensive Trades-	24.
Fried Fish Shops-	79.
Common Lodging Houses-	12.
Tents, Vans & Sheds-	182.
Factories-	517.
Bakehouses-	106.
Public Conveniences-	96.
Places of Entertainment-	60.
Refuse Collection-	1000.
Rats and Mice Destruction-	63.
Schools-	63.
Shops-	1559.
Miscellaneous Visits-	691.

SWIMMING BATHS AND POOLS.

The position remains as before except that there are now no swimming pools in the area which are not efficiently chlorinated.

ERADICATION OF BED BUGS.

The number of private dwellings reported as being infested was considerably less. Council houses numbering 18, and private dwellings numbering 25.

The procedure for disinfection remains as in previous years.

SCHOOLS.

The road at the rear of Mill Road, Caerphilly, Infants Schools, remains in the same unsatisfactory state; reported upon for many years past.

The unsufficiency of exits may be remembered upon in Twyn, Caerphilly, Infants School, and in Senghenydd Junior Mixed School.

HOUSING.

The general housing position remains satisfactory. No overcrowding survey was carried out during the year, but up to the outbreak of War there was no reason to believe that the overcrowding index which was 1.03 in 1938, had substantially altered.

The weeks subsequent to the commencement of hostilities resulted in a considerable influx of unofficial evacuees, but these were not sufficient to reduce the standard of working class housing to any extent.

TEMPORARY DWELLINGS.

Visited during the year-	182.
Demolished-	8.
Vacant at the end of Year-	1.
Total number remaining end of Year-	89.

--

MILK SUPPLY.

Number of Cowsheds in the Area-	99.
Number of Inspections to Cowsheds-	110.
Number of Dairies in the Area-	117.
Number of Inspections to Dairies-	159.

The following are licensed to produce and sell
Tuberculin Tested Milk:-

Mr.A.E.Pritchard, Energlyn Farm,Caerphilly.
Mr.A.E.Edmunds,Ty Isaf Farm,Caerphilly.

There are also two Producers of Accredited Milk:-

Messrs.J.J.Phillips,Garth Farm,Abertridwr.
Mr.S.Thomas, Pen-y-Waun Farm,Nelson.

29 Samples were taken during the year. 8 were unsatisfactory. This is a high percentage, and is indicative of the necessity of increased farm inspection by your Sanitary Inspectors. It is hoped the coming year will show a considerable improvement.

INSPECTIONS OF MEAT AND OTHER FOODS.

There are 22 licensed Slaughtermen.

During the year the following Meat and other foods were found to be diseased, unsound or unwholesome:-

Beef-	2690 lbs.
Mutton-	220 "
Pork-	1100 "
Offals-	148 "
Roast Pork-	10 "

PREVENTION OF INFECTIOUS DISEASE.NOTIFIABLE DISEASES (EXCEPT TUBERCULOSIS).

The following Table shows the number of cases of notifiable diseases, the number admitted to Hospital and the number of deaths.

Disease according to Notification.	Cases Notified.	Admitted to Isolation Hospital.	Number of Deaths.
Small Pox.	Nil.	Nil.	Nil.
Scarlet Fever.	195.	195.	Nil.
Diphtheria.	22.	22.	3.
Typhoid and Para Typhoid.	Nil.	Nil.	Nil.
Pneumonia (Acute Primary and Influenzal).	20.	Nil.	24 (all forms).
Cerebro-Spinal Fever.	3.	3.	3.
Ophthalmia Neonatorum.	2.	Nil.	Nil.
Erysipelas.	7.	1.	Nil.
Dysentery.	Nil.	Nil.	Nil.
Puerperal Pyrexia.	7.	7.	1.

SCARLET FEVER, DIPHTHERIA AND CEREBRO-SPINAL
FEVER INCIDENCE DURING THE PAST 14 YEARS.

SCARLET FEVER.			DIPHTHERIA.		CEREBRO-SPINAL FEVER.	
Cases & Deaths.			Cases & Deaths.		Cases & Deaths.	
1926.	12.	1.	79.	2.	1.	Nil.
1927.	35.	Nil.	182.	6.	1.	Nil.
1928.	69.	Nil.	76.	6.	Nil.	Nil.

1933.	255.	Nil.	159.	3.	Nil.	Nil.
1934.	195.	1.	167.	7.	Nil.	Nil.
1935.	73.	Nil.	174.	12.	Nil.	Nil.
1936.	49.	Nil.	122.	10.	1.	1.
1937.	205.	Nil.	68.	1.	1.	1.
1938.	268.	1.	65.	1.	2.	2.
1939.	195.	Nil.	22.	3.	54	3.

During the year Measles and Whooping Cough were made notifiable, but there is no evidence that there were any marked increases in the incidence of this disease. However, a different picture was presented in the incidence of Cerebro-Spinal Fever. This is a disease of overcrowding and bad ventilation. With the wise provisions of the 1936 Housing Act temporarily, more honoured in the breach than in the observance, we must be prepared for an increased incidence and severity of this disease. Fortunately we are able to nurse these cases and treat them with all modern means at our Isolation Hospital, and results to date are extremely good.

The type of Scarlet Fever during the year was extremely mild, the number of cases somewhat below average. It is a matter of opinion as to whether the expenditure of public money in the nursing of these cases, except those of the more severe type, is justified either in the prevention of the disease, or in the hospitalization of such a mild complaint. The use of Anti-Scarlet Serum has again proved itself of great value in reducing the period of stay, and limiting complications in very many cases.

It is a matter of great pleasure to report that the number of cases of Diphtheria during the year 1939 was the lowest for any year during which figures are available. This is in large measure due to the full force of immunization which is being carried out during the past few years. I may add that this low incidence of diphtheria is not a common one during the year under review. In fact there were most serious epidemics amongst the population of neighbouring authorities, and most of our accommodation at Energlyn was occupied in the nursing of these cases from contiguous areas. Active Immunization proceeded steadily in all wards, the total number being immunized during the year amounting to several hundred.

It was not necessary to take any action relating to persons suffering from Pulmonary Tuberculosis, employed in the milk trade under the Public Health (Prevention of Tuberculosis) Regulations 1925, nor under Section 62 of the Public Health Act 1925, nor Section 172 of the Public Health Act 1936, relating to the compulsory removal to Hospital of patients suffering from Tuberculosis.

An investigation into the state of the Tuberculosis Register was carried out by the department and a most unsatisfactory state of affairs was revealed. I regret to say that as constituted the present register is no indication of the incidence of Tuberculosis in your area. However, a method of exchange of information between the Tuberculosis Clinic and this Health Department will, it is hoped, produce a register which is accurate and complete.

The following table shows the number of new cases, and mortality from Tuberculosis during 1939:-

AGE PERIODS.	NEW CASES.				DEATHS.			
	Respiratory.		Non-Respiratory.		Respiratory.		Non-Respiratory.	
	M.	F.	M.	F.	M.	F.	M.	F.
0-	0.	0.	0.	0.	0.	0.	0.	0.
1-	1.	0.	0.	0.	0.	1.	1.	0.
5-	0.	1.	2.	1.	1.	2.	1.	1.
15-	1.	2.	5.	3.	2.	1.	2.	1.
25-	10.	8.	1.	1.	3.	4.	0.	1.
35-	2.	5.	3.	0.	2.	4.	0.	0.
45-	1.	2.	0.	0.	0.	2.	0.	0.
55-	2.	0.	1.	1.	0.	0.	0.	0.

(18).

PREVENTION OF BLINDNESS.

No action was taken for the prevention of blindness or for the treatment of persons suffering from any disease or injury of the eyes.

AIR RAID PRECAUTIONS.

During the year the personnel of the Casualty Service remained most loyal to their Stations, and when the time comes to describe what has been done, this personnel will be found to have shown a devotion to duty and a sense of public spirit second to none in this country.
